## 📄 PROFILE

I finished my studies in Computer Science and Engineering at Akdeniz University. I've been working with Swift and Flutter to create apps for one year now. I'm always looking to improve my skills in OOP, POP, and other design principles. I've built apps using Firebase and its tools, and I'm also familiar with working with REST APIs. I'm open to learning and using new technologies as they come along.

## 🌐 LANGUAGES

**Turkish** — Native/Bilingual

**English** — Fluent

## 🎓 EDUCATION

**3.28**, Bachelor of Science in Computer Science, Akdeniz University

Sep 2018 – Sep 2023 | Antalya, Turkey

## 📜 CERTIFICATES

**The Complete Flutter Development With Dart** 📄

Udemy-Angela Yu

**iOS Programming Path With Swift** 📄

Patika

**Code Carnival: Flutter Edition Bootcamp**

TechCareer-Kasım Adalan

**iOS&Swift - The Complete iOS App Development Bootcamp**

Udemy-Angela Yu

## 📁 PROFESSIONAL EXPERIENCE

**Mobiroller**, iOS Developer

Jul 2023 – Nov 2023 | Antalya, Turkey

- I contributed to a team project, utilizing Swift and collaborative development methodologies to achieve project goals.
- I applied the Model-View-ViewModel (MVVM) architecture to organize project components effectively and ensure scalability.
- We utilized Git for version control, effectively managing project changes, and collaborating with team members.

**Odeon Software & Technology**, Associate Software Developer

Apr 2023 – Jun 2023 | Antalya, Turkey

- During my internship, I focused on learning C# and understanding the MVC pattern.
- My ability to quickly grasp and implement new concepts allowed me to become proficient in C# and MVC architecture within a short period.

**Mavi Ar-Ge**, Flutter Developer

Aug 2022 – Sep 2022 | Antalya, Turkey

- I became adept at integrating the apps with web services and APIs, facilitating seamless data sharing and enhancing user experience.
- Throughout my internship, I further refined my Flutter expertise, focusing on developing responsive and interoperable apps while maintaining high code quality and optimal performance.

## 📁 PROJECTS

**Travelogue** 📄

May 2024 – present

This iOS application allows users to plan and book travel tickets and hotel accommodations seamlessly. Users can select their destinations, view available transportation options, make payments, and book hotels, all within the app. Data management is handled through Firebase, with additional features including Map integration, MVVM architecture, Localization, POP, and clean code practices for enhanced functionality and maintainability.

**HesApp**

Mar 2023 – present

HesApp is a Flutter-based project supported by TÜBİTAK, aimed at revolutionizing the cafe experience. It simplifies the ordering and payment process, benefiting both customers and cafe owners. By leveraging digital technology, HesApp enhances convenience, efficiency, and interactivity, making cafes more enjoyable and vibrant spaces.

**Vocabble** 📄

Jul 2023 – Nov 2023

Vocabble is a Swift-based app designed to enhance users' English language skills by helping them learn and remember new words. Its user-friendly interface and simple design facilitate effortless learning. Powered by Swift, Vocabble ensures smooth functionality, keeping users engaged and motivated to improve their language proficiency.

## 🧠 SKILLS

MVVM | MVC | OOP | POP | Swift | Dart | Flutter | Java
