Mavi Ar-Ge, Flutter Developer

08/2022 – 09/2022 | Antalya, Turkey

- Developing cross-platform mobile applications using the Flutter framework.
- Writing clean, maintainable, and efficient code in Dart programming language
- Integrating RESTful APIs and web services into the application.

📁 PROJECTS

Vocabble

07/2023 – present

Vocabble is designed to help users enhance their vocabulary and improve their English fluency. With its user-friendly interface, the app allows users to effortlessly expand their word bank and conveniently review words for better retention.

HesApp

03/2023 – present

HesApp is to revolutionize the ordering process and payment operations in café establishments. It seeks to enhance the overall customer experience by providing a user-friendly and efficient platform for placing orders, while simultaneously simplifying billing management for café proprietors. By leveraging digital technology, the system aims to optimize operations, improve convenience, and foster a more engaging and interactive café environment.
